PROJECTS

Portfolio Website

- Crafted a visually appealing and interactive portfolio website utilizing CSS, HTML, and JavaScript, to showcase my passion for software engineering.
- Utilized CSS techniques to create a user-friendly interface, allowing for seamless navigation and cross-platform accessibility.

Google Charity Finder - ShellHacks FIU Hackathon

- Developed a website allowing users to find charities at any location chosen and displaying an AI chatbot to learn more about the shown charity using React.js, Google API, and Gemini API.
- Applied CSS to display a unique and user-friendly website that is easy to navigate and control.

2D Platformer Game

- Developed a 2D platformer game in Unity using C#, featuring player controls, animations, multiple levels, and interactive elements like enemies and power-ups.
- Designed engaging levels, implemented sound effects and UI elements, and ensured smooth gameplay and performance across various devices.
